

Gold Slides

GENERAL

EMF gold slides are suitable for a wide variety of analytical and biological test applications. Our glass slides are coated with a binder layer of chrome or titanium, based on customer preference, followed by a deposition of bare gold with no protective overcoat.

SPECIFICATIONS

- Substrates: Float glass, cut edges, available in .040" (1mm) and .062" (1.5mm) thickness
- Dimensions: Our standard sizes are 1" x 3" and 1" x 0.25". Other sizes are available
- Coating: 50 angstroms chrome or titanium followed by 1,000 angstroms gold
- Purity: Our gold is 99.9% pure.
- Packaging : 1"x 3" slides are packaged 5/tube
