

EMF

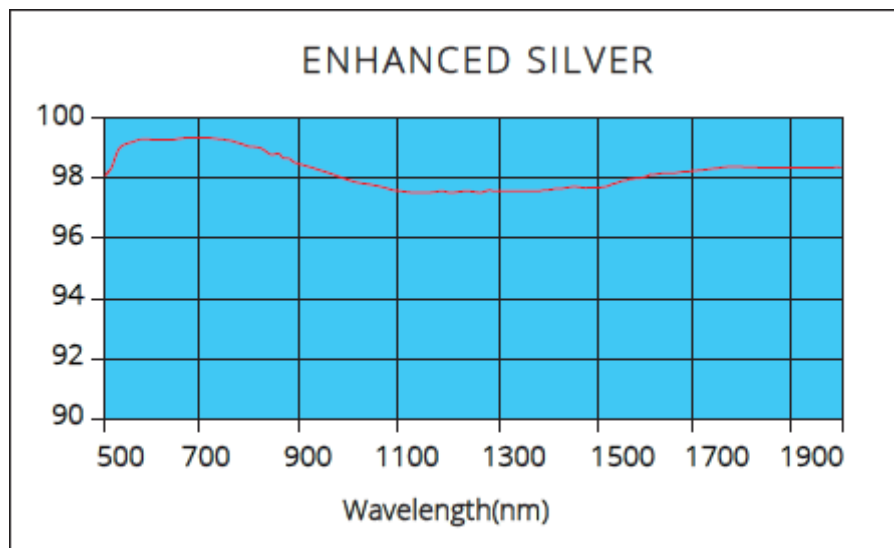

Enhanced Silver

EMF's Enhanced Silver is an ideal coating for high reflectance in the IR range.

- Suitable for glass, aluminum, and nickel plated beryllium substrates
- Can be deposited on substrates up to 50"
- Meets Mil-M-13508 adhesion, abrasion, temperature and humidity specifications

SPECTROMETRIC CHARACTERISTICS

SPECIFICATIONS

Product #	Name	Reflectance	Wavelength	Surface Quality
AgENH	Enhanced Silver	>98% avg.	500-2,000 nm	80/50, 60/40
